Autumn M327(P) has had two calves in two years and is PTIC. Maverick Q8 is her first while her second is a weaner bull by Jethro.

Autumn H507(P) had three calves in three years. Two of these classified S.

OPPORTUNITY here. Maverick Q8(P) was missed at the time of catalogueing and was not found for four weeks so has not had the same preparation as

the other bulls. He will not catch up by sale day so his weight will be low compared to the other bulls. He will be overlooked by most as a result. His EBVs more accurately describe his genetic potential. In addition, we recommend him for use as a sire with heifers.
